I am currently a PhD candidate in economics at Université Laval. I hold a degree as a Statistical and Economic Engineer, having been selected through a highly competitive pan-African examination organized by the French institution CAPESA, within a school that is accredited with the African Excellence label by the World Bank.

Education

PhD candidate in economics **2024-2029(expected)**
Université Laval, Québec, Canada

Statistics and Economics Engineer **2019-2022**
École National de la Statistique et de l'Analyse Économique (ENSAE), Dakar, Sénégal

Bachelors in applied mathematics **2015-2018**
Université d'Antananarivo, Antananarivo, Madagascar

Research

Work in progress:

Measuring Altruism: Precision vs. Simplicity (With **Sabine Erica Kröger** and **Arnaud Dellis**)

Before phd research:

“The impact of the green transition in the agricultural sector, in general, on the structure and significance of green employment in Senegal.” Supervised by **Thierno Ibrahima Barry**

“Determinants of gender-based violence: the cases of Cameroon and Senegal” with Ngor Kabe supervised by **Souleymane Diakité** and **Idrissa Diagne**.

Professional experience

Teaching Assistant **2025-2026**
Université Laval, Québec, Canada

- ECN 7000: Microeconomics (Prof. Sabine Kröger), Fall 2025 at Laval University
- ECN 1180: Introduction to Behavioral Economics (Prof. Sabine Kröger), Fall 2025 at Laval University
- ECN 2200: Information and contract economics (Prof. Sabine Kröger), Winter 2026 at Laval University

Research Assistant **2025-2026**
Université Laval, Québec, Canada

- Contributed to research project in Behavioral and experimental economics

- Programing experience in economics by OTREE

Senior Analyst

2022-2024

INSTAT, Antananarivo, Madagascar

My main responsibilities include data collection, processing, and analysis; training and supervising surveys; and producing statistical and economic reports. My achievements include:

- Design and implementation of the Madagascar Household Permanent Survey (EPM).
- Contribution to the drafting of the 2021 EPM report.
- Supervision of enumerators on the World Food Programme (WFP) “Fill the Nutrition Gap” project.
- Design and implementation of the urban mobility survey in Antananarivo.

Internship for thesis writing

2022

Agence Nationale de la Statistique et de la Démographie (ANSD), Dakar, Sénégal

During a three-month period, I completed an internship as part of the requirements for obtaining my degree as a Statistical and Economic Engineer. During this internship, I wrote and publicly defended a thesis entitled: “The impact of the green transition in the agricultural sector, in general, on the structure and significance of green employment in Senegal.”

Participation in the ANSD survey project funded by LAREM ANSD, Dakar, Sénégal

2021

Participation in the ENSAE survey project funded by INSEE ANSD, Dakar, Sénégal

2020

Specific skills

Languages: French (native), English (advanced – reading and writing scientific publications, communication at conferences)

IT Skills: Excel (expert), VBA (advanced), Stata (advanced), EViews (advanced), SPSS (advanced), R programming (expert), SPAD (advanced), oTree (experience in an educational context)

Other Skills: Data collection, processing, and analysis; econometric modeling; economic modeling

Leadership: Strong listening and communication skills, autonomous with the ability to work in a team, quick adaptability, concise thinking, and critical mindset

Scholarship and Distinction

Matuszewski Scholarship

2026-2027
